Preface

Karin FISCHER AUSSERER

Director of the City of Vienna Department of Urban Archaeology

Dear Colleagues,

on behalf of Urban Archaeology Vienna I would like to wish you all a warm welcome to the 16th International Conference on Cultural Heritage and New Technologies (CHNT) here in The Coat of Arms Halls of Vienna City Hall.

Over the years this event has evolved from a modest gathering of a small number of archaeologists to an internationally recognised event attended by experts from around the globe.

As decided by the scientific committee at last year's post-conference meeting, this year's event marks the start of a five-year conference cycle. This year's theme of "Prospection, Survey and Data Integration" will be followed in 2012 by "Excavation"; 2013 "Correct Documentation"; 2014 "Processing" and concluded in 2015 by "Public Relations". This series of five consecutive conferences will consider these aspects of archaeology and cultural heritage with a particular focus on urban archaeology.

At this point I would like to thank the members of the scientific and local committees and the chairs for their great dedication and without whom this conference would not be possible.

Taking place for the first time this year is the section "Urban Archaeology" with the theme "Streets, Roads and Squares". In this section, the technological issues will step back and let the archaeology itself be the main focus. The planning and realisation of this section will be lead by staff from Urban Archaeology Vienna, whom I would also like to greatly thank.

The "Vienna CHNT Poster Award" is taking place for the third time this year and enjoying growing popularity. It presents a good opportunity for many newcomers to get their first taste of a conference and perhaps lead on to a full presentation in next year's "Newbies" session.

I must not forget to thank the rest of the staff at Urban Archaeology Vienna, as well as the various departments of Vienna City Council, whose assistance in the planning and execution of the conference has again been essential.

Finally, I would like to wish the conference a smooth run and hope that all participants have three days full of new information, ideas and discussions, but also a little time to enjoy the Viennese hospitality and the wonder of this magnificent city.
